For a Cold in the Head

NERVOUS?

Exhausted, Weak, Tired All the Time? Are You Pale, Thin and Without Ambition?

The trouble is impure and watery blood that does not carry the necessary nutriment and strength to the different organs of the body. Blood is the important link between food and life. If your blood does not carry all the elements necessary to life and health, these troubles follow. One of the most important elements is iron, Iron is what makes the blood rich, red and strength giving. It is the one element most often lacking. You need iron.
